Darien, WI 53114

Village of Darien Vacant Building Licensing Program for Residential and Commercial Properties

The purpose of the Vacant Building License:

The Village of Darien is concerned about vacant buildings that have become dangerous, unsafe, or are in a state of disrepair. Buildings that are vacant can become a blight, may cause neighborhood deterioration, instability, and may have an adverse impact on adjacent and nearby properties. Buildings that are vacant and not properly secured attract and are prime locations to conduct illegal criminal activities. They also create an attractive nuisance for graffiti, dumping of trash, and vandalism.

Buildings that Require a License:

All residential, commercial, manufacturing, institutional, and mixed-use occupancy buildings in the Village (that have been vacant for 180 consecutive days) are required to be registered, inspected, and licensed.

Exemptions:

-Buildings or structures with a current Village of Darien raze permit; or buildings that have been issued a current building permit for the purpose of repairing to occupancy standards.

Building Inspections:

Village code and fire officials will inspect the vacant building to determine its structural integrity, what actions need to be taken to maintain the safety of the premises for entry of police officers and fire fighters in time of exigent circumstances or emergency, that the building and its contents do not present an imminent hazard to the public during the time that the building remains vacant, and that the building is in compliance with the vacant building maintenance standards. Inspections may be conducted with the consent of the building owner or responsible party; or, without consent if the building poses a hazard to the health, welfare, or safety of the general public.

Orders to Repair:

-All code violations will be included in a written *Order to Repair* which will state the time-frame for completion;
-Once completed, staff will issue the license which is good for 1-year from the date of compliance;
-Failure to make code-required repairs by the deadline will result in re-inspection fees and may result in municipal forfeitures for non-compliance with this program.

Vacant Building or Structure Requirements:

- An annual permit application identifying who owns the building or structure, who manages the building or structure, and who is responsible for the building or structure;
- An annual interior and exterior inspection of the building or structure by Village staff;
- An annual license fee of \$300 for Commercial and \$100 for Residential buildings;
- Compliance with the building maintenance standards to ensure the building remains structurally sound and all components are in good repair.

Maintenance Standards for Vacant Buildings:

Building Openings: Must be weathertight and waterproof. Must be secured against entry of people or animals.

Roofs: Sound and weather tight. Must not allow moisture or rain into the building.

Drainage: Storm drainage functional and installed to code.

Building Structure and Premises: In good repair, structurally sound, and free from rubbish and debris (both interior and exterior).

Structural Members: Free from deterioration and capable of supporting imposed live and dead loads.

Foundation Walls: Structurally sound, free of open cracks and breaks, free of leaks, and rodent proof.

Exterior Walls: Free of holes, rotting material, and protected from the elements by weather coating such as paint.

Decorative Features: Anchored, in good repair, and protected from the elements by weather coating.

Overhanging Extensions: In good repair, anchored, and safe and sound. No rust or rotting materials.

Chimneys and Towers: Structurally safe and in good repair.

Walkways: In good repair, safe for pedestrian travel. Snow and ice removed within 24 hours of snowfall.

Accessory Structures: In good repair and free from hazards.

Yard Area: Free from graffiti, trash and weeds. Lawn maintained at least less than 12" in height.

Waste Removal: Upon vacancy, owner must immediately remove all interior and exterior waste, debris and excessive vegetation.
